

Can a 10kW solar generator power a house?

A 10kW or more solar generator is a great choice if you want to power your entire home or run several large appliances. The problem is that such a solar generator is hard to find. Most solar generators top out at 3,000W to 5,000W. To get 10,000W of AC power, you typically have to install a permanent solar system with a powerful 10kW inverter.

How much does a 10kW solar generator cost?

But generally, a 10kW+ solar generator can power most homes. Note, however, that if you have a 120V AC solar generator, it will not power any 240V appliances and systems. How much does a 10kW+ solar generator cost? 10kW+ solar generators typically start at \$5,000. But they can cost over \$10,000 if they have multiple battery packs.
