

What are the top solar power myths?

One of the top solar power myths is that the addition of solar panels to a home will raise property taxes due to the increase in property value. However, the truth is that installing residential solar panels will raise a property's value in many cases.

What are the biggest misconceptions about solar energy?

One of the biggest misconceptions about solar energy is that it is not large enough to provide for all of our energy needs, or that we would need to cover the whole earth with solar panels to produce all of our needed energy from solar. This is due to the fact that solar energy is very diffuse.

What would happen if people knew more about solar energy?

If people were more educated about solar energy, their mindset might change from "That's cool" or "That's interesting" to "I want that" and, more importantly: "I need that". People would start thinking that solar panels were just what they needed to lower their electric bills.

Do solar panels store energy in batteries?

In addition to any state incentive offered, the federal government is currently offering a 30% tax credit for solar array systems installed before the end of 2019. Myth: Solar panel systems will store excess energy in batteries. Fact: The majority of home solar power systems do not store energy in batteries.

Will solar panels look unattractive on my roof?

In fact, Germany, a country that gets less than half as much sun as the sunniest city in the U.S., has one of the most successful solar initiatives in the world. Myth: Solar will look unattractive on my roof. Fact: Ultimately, the aesthetic appeal of solar panels on a residential roof is subjective.

Do solar panels get more efficient in cold weather?

Conductivity increases in cold temperatures, making electricity flow more efficiently, while higher temperatures can reduce the panels' efficiency. As solar panels get hotter, they produce less power from the same amount of light. Myth: Solar power will get more efficient, so I should wait to buy or install.
