What is Y&H grid tie inverter?

Y&H grid tie inverter is designed for solar panels. The working voltage of solar panels depends on the intensity of sunlight, which means that the panel voltage varies. There is also an increase in the voltage at the moment the solar panel starts. When you use a 12V solar panel, the working voltage of the panel is 18V-21V.

What is the working voltage of a solar panel?

The working voltage of solar panels depends on the intensity of sunlight, which means that the panel voltage varies. There is also an increase in the voltage at the moment the solar panel starts. When you use a 12V solar panel, the working voltage of the panel is 18V-21V. But the moment of starting is to reach 24V or higher.
