

What is 18/2 cable?

Looking for specific info? 18/2 cable consists of two cables: 2 conductors 18 gauge electrical cable in a PVC jacketed cable. This type cable is great for use with CCTV equipments. The wires offers the superior quality signal that you need to connect either your camera or alarm system in one cable.

What is a 18/2 fire alarm cable?

The 18/2 Fire Alarm Cable boasts PVC insulation with two 18 gauge solid bare copper conductors. Its CL3R CMR-rated jacket is equipped with a rip cord for effortless separation and complies with current NEC guidelines, validated by external standards organizations. Prioritizing premium fire alarm cables is essential for protecting lives.

What is a plenum rated cable?

1. Plenum Rated Cable: Plenum cables have a higher fire rating and are designed with fire-retardant plastic jacket of either a low-smoke PVC or a fluorinated ethylene polymer (FEP). 2. Riser Rated Cable: Riser rated cables run between floors through cable risers or in elevator shafts in non-plenum areas.

What is a plenum rated fire cable?

Plenum rated fire cables means it can be run in the area between floors that is used as duct area or other air space. Plenum refers to the material used in the jacket of the cable burns less than non-plenum cables. Plenum vs Riser in Cabling Design - Why Plenum?

What is a riser rated cable?

Riser Rated Cable: Riser rated cables run between floors through cable risers or in elevator shafts in non-plenum areas. These cables must also self extinguish and prevent the flame from traveling up the cable in a vertical burn test. 3. General Purpose Cable: General Purpose cables have no fire rating.
