SOLARA\_U Fuel Service specifications Fuel type: ENGINE ENGINE LUBRICATION 5S- FE engine Valve clearance (engine cold), mm (in.): Oil capacity (drain and refill), L (qt., Imp. Unleaded gasoline, Octane Rating 87 5S- FE engine qt.): (Research Octane Number Intake 0.19--0.29 (0.007--0.011) 5S- FE engine higher Exhaust...

How does a fuel pump relay work?

2 black/red goes to the other solenoid inside the relay, and it also goes to the actual switch (armature) that gets pulled on by the solenoid and sends the power to the 1 blue/black wire. The 4 green/red is controlled by the ECU and when the ECU grounds this it energizes the relay's solenoid and turns on the fuel pump. This is the safety mechanism.

How do I check for power at the fuel pump?

To check for power at the fuel pump, you need to be cranking the engine (probably a bad idea), have the key in the "On" position while holding the door to the AFM open (air flow meter, on the top of the air box), or by putting a jumper between B+ and Fp in the diagnostics connector.

How does a 4 green fuel pump work?

The 4 green/red is controlled by the ECU and when the ECU grounds this it energizes the relay's solenoid and turns on the fuel pump. This is the safety mechanism. The ECU will not allow the fuel pump to stay running unless the engine is turning and the ignition coil is firing.

To check for power at the fuel pump, you need to be cranking the engine (probably a bad idea), have the key in the "On" position while holding the door to the AFM open (air flow ...

A 3 wire crankshaft sensor receives a hot power source called reference voltage from the electronic control unit. ... such as the crankshaft position sensor, the throttle position sensor, the coolant sensor, and the fuel ...

The early MZ engines had poor knock control. The reliability of the knock sensor is low. Bad sensor causes a power reduction and rough acceleration. Toyota fixed that problem on the 3MZ-FE engine by installing a new flat-type knock sensor. VVT-i components are a headache also. It leaks with oil or fails, causing shaking operation and drop of power.

The fuel pump kit I installed didn"t fit the original power wire clip so I soldered the extra on that came with the pump and used shrink tubing over that. I think I did a good job getting a solid connection I am unsure as the where so much resistance that the paperclip would glow could be coming from.
