

2004 toyota solara video power steering pump removal

How do you remove a power steering oil pump hose?

Remove the clip and disconnect the oil reservoir to pump hose No.1. NOTICE: Take care not to spill fluid on the V belt. Disconnect the connector from the power steering oil pressure switch. Using a spanner (27 mm) to hold the pressure port union, remove the union bolt and gasket. Disconnect the connector from the oil pressure switch.

How do you disconnect a power steering oil pressure switch?

Disconnect the connector from the power steering oil pressure switch. Using a spanner (27 mm) to hold the pressure port union, remove the union bolt and gasket. Disconnect the connector from the oil pressure switch. "My friends call me 'The Cane.'"

How do I remove a pressure sensor?

Don't remove the pressure sensor. Unplug its wiring harness, be very gentle as the sensor's plug is brittle plastic, and use a 24mm wrench on the banjo bolt to remove them together. The pump's pivot bolt can not be seen and needs to be done by feel. Also, replace the banjo bolt's washer and feeder line's O ring. It should take around 2 hours.

2005 Toyota Solara 4 cyl. Trying to diagnose mysterious whine when turning steering wheel that started after replacing pump (twice now in the span of about a week) and ...
