

What is the best solar incentive in Georgia?

The best solar incentive in Georgia is actually a federal tax credit. The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC.

Does Georgia offer solar rebates & tax incentives?

Unfortunately, Georgia does not offer solar rebate programs and tax incentives as of 2023. However, solar easement laws protect your access to sunshine, limiting any constructions that could cast permanent shadows on existing solar arrays. Incentive Value: Green loans with 9.90% APR and a term of up to 96 months.

How much does a solar system tax credit cost in Georgia?

Given the average solar system cost of \$36,190 in Georgia, the 30% credit usually comes out to \$10,857. You can save that much on your tax bill if you owe enough to cover the credit, which can effectively bring down the cost of your system. Any unused credit can be rolled over to four additional tax years for a total of five years.

Does the Georgia Power Home Energy Improvement Program offer rebates for solar?

Once the loan is paid off, you will have a free electricity source for decades. The Georgia Power Home Energy Improvement Program (HEIP) does not offer direct rebates for solar energy systems. However, you can claim the benefit if you combine your solar installation with home energy efficiency measures.

How much does a 5 kW solar panel cost in Georgia?

In Georgia, the average cost for a 5 kW solar panel system is around \$13,160. Once you factor in the 30% credit, the cost of a solar panel system in Georgia comes down to \$9,212. When you file your taxes, you can claim this incentive as a credit towards your federal tax bill.
