

How to use 202u receiver?

Turn power off to receiver. 202U receiver has two relays on board which provide normally open 2. Press and hold both PRG1 and PRG2 button. & normally closed voltage-free dry contact (doesn't output power) 3.

Can I use 202u receiver for wiring a light bulb?

Following examples are using 202U's Relay 1 for wiring, you can use Relay 2 of course, the idea is the same. The following is a simple wiring diagram for controlling light bulb on & off using our 202U receiver. The light bulb is using 110Vac mains power, while our receiver is using 12Vdc regulated power through power adapter or battery.

Does 202u care about polarity?

Although 202U doesn't care about polarity, your target device may care, so inspect wiring carefully before power up, to avoid damage. LS on receiver board stands for limit switch, LS1 & LS2 controls relay 1 & 2 respectively, they share a common connection COM, so the 3 blue terminals from up to down can be read as LS1 COM LS2.

What is SR-rs-202u receiver?

Our SR-RCS-202U receiver can be useful when you want to upgrade your old garage door opener remote, or you want to control different brands of garage door openers using one remote. Recently we have helped one customer with the SR-RCS-202U receiver installation on two garage door openers, one is some Merlin model, while the other is ATA GDO-7 V1.

What garage door openers are compatible with SR-rs-202u?

Our SR-RCS-202U can be used pretty much on every garage door opener with push button or manual trigger terminals.

I have the 202u unit v5 working with the 2 original remotes that it came with. I am trying to program 2 more remotes of the same type but the 202u does not work as the ...
