

What is solar energy?

Solar energy is energy from the sun. It's clean, renewable, and abundant. You use solar energy every day without even knowing. It's a key player in many aspects of your life. Sun, our bright and shining star, gives us light and warmth every day. But did you know, the sun also gives us a type of energy called solar energy?

Does solar energy run out?

This energy is clean, safe, and will never run out as long as the sun shines. Solar energy is captured using solar panels, which are like big, flat screens that love to sunbathe. These panels soak up the sun's light and change it into electricity. This electricity can power your toys, your TV, and even your whole house.

How does solar energy work?

Solar energy is captured using solar panels, which are like big, flat screens that love to sunbathe. These panels soak up the sun's light and change it into electricity. This electricity can power your toys, your TV, and even your whole house. What's great about solar energy is that it is clean.

What is energy conversation?

The goal of Energy Conversation is to make it easier for people to comprehend the advantages, difficulties, and possibilities associated with the future of energy. How to improve public involvement in energy decisions and energy issue resolution may also be a topic of discussion in the energy conversation.

Is solar energy a good idea?

What's great about solar energy is that it is clean. Unlike coal or gas, it doesn't make our air dirty or cause harmful changes to our planet. Plus, once the solar panels are set up, the energy is free. It's like having a tiny sun in your backyard, powering your house! But, there's more. Solar energy is not only for homes.

Is solar energy a gift from the Sun?
