

What is a 30 amp solar generator?

A 30 amp solar generator replaces shore power, allowing you to power your RV or boat where you are. This is handy when you are away from an RV park or dock -- e.g. during road trips, when boondocking, or during overlanding trips with a camper trailer. A 30 amp solar generator has the same outlet you find in RV parks.

What is a 30A solar generator?

You've come to the right place. A 30A solar generator is useful when you don't have access to shore power at a camping site, RV park or dock. You can power your RV or boat by plugging the 30 amp plug into the solar generator's 30A outlet. This lets you travel and go camping wherever you want without worrying about access to power.

Can a 30 amp solar generator power an RV?

A 30 amp solar generator has the same outlet you find in RV parks. It'll power your AC appliance and also charge your deep cycle batteries. Many 30A solar generators have a second 30 amp 12V DC outlet. It's called an Anderson power port. You can use it to power your RV's or trailer's DC circuit.

How many solar panels do I need for a 30 amp controller?

This will also affect the number of panels you need. Calculating the number of solar panels you need for a 30 amp controller involves a few steps. This is calculated by multiplying the voltage of your system by the amperage of your controller. For example, if you have a 12V system, your controller can handle $12V \times 30A = 360$ watts.

How much power does a retreat solar kit have?

The Go Power! Retreat Solar Kit features 100 watts and 5.43 amps of charge power. For extended or full-time traveling, see our Overlander Solar Kit or an AC power system like the Solar Elite. Learn how to choose a solar kit, select an Expansion Kit for the Retreat or use our Go Power!

What is the best solar charging kit?
