

# **Absone solar charger and power bank combo**

How many charges can the solar power bank hold?

The solar power bank holds up to five charges, ensuring you won't end up with any dead devices, no matter where you are. Its solar panels let you charge it up with some sunlight or with a USB-C chord - whichever option is most convenient. There's a good reason it's considered the top solar power bank on the market.

How do you charge a solar power bank?

Most solar power banks have two power options - wall charging and solar charging. To charge a solar power bank, your best bet for a quick-charge is to plug it in and use the sun rays to keep things kicking.

Should I buy a solar charger?

Even the highest-capacity power banks eventually run out of charge, and then you're stuck until you next reach mains power. Unless, you buy a solar charger. Harnessing power from the sun's rays, solar chargers are a useful backup to plugging into a power point.

Do you need a USB-C cable for a solar charger?

While a few of these chargers come with a micro-USB cable, you'll likely need your own USB-C cable to ensure your device can be charged. The Big Blue solar charger is a direct-to-device charger: you won't be able to store the power for later like a power bank, but it will add a bit more life to your dying phone or tablet.

What is a big blue solar charger?

The Big Blue solar charger is a direct-to-device charger: you won't be able to store the power for later like a power bank, but it will add a bit more life to your dying phone or tablet. With an efficiency rate up to 23.5%, you can leave it out in the sun outside to charge your gadgets, or strap it to your bag on a hike.

Do solar power banks need to be charged first?

Solar power banks can be charged before using solar energy using a normal electric outlet. When using solar power banks to charge a device, connect it with a USB or wireless connection.
