

Who is AES Solar?

AES Solar was established in March 2008 as a joint venture between the AES Corporation (NYSE: AES) and Riverstone Holdings LLC, with committed capital of \$1 billion. The company develops, owns and operates utility-scale solar power plants that are connected to the power grid and supply homes and businesses with clean, renewable energy.

How is AES revolutionizing the future of solar?

AES is fundamentally changing the way solar is installed to make it faster, safer, scalable and cost-effective to accelerate decarbonization for businesses worldwide. That's why we're revolutionizing the future of solar through our first-of-its-kind solar installation robot, Maximo, and our innovation partnership with 5B.

Why should you choose AES Solar?

Why Now? Using cutting-edge modeling, AES Solar provides estimates for all customers, not just for what the systems will cost, but also for how much power they will generate. We can then use this data, along with your power bills, to calculate the value of your produced energy, which will tell us how much money you will save each month.

What does AES offer?

Partner with AES for global, clean, 24/7 renewable energy solutions. AES offers strategic energy potential, industry advantage, and paves the way to a sustainable future. AES is a Fortune 500 energy leader championing a sustainable future through smart, green solutions.

When will AES' Solar project come online?

The two phases of the project are expected to come online in 2025 and 2026, respectively. This significant acquisition accelerates AES' deployment of unique renewable energy solutions to our key corporate clients in the California market,
