

What is an AGL Solar System?

An AGL solar system means end-to-end support from designing and constructing a system, to grid connection, approvals, application for available incentives and even monitoring and maintenance. Our experts have covered and supported from small bank branch rooftops to systems the size of several football fields.

How can AGL help you get the most out of solar?

After you're all set up with solar, AGL can help you get the most out of your solar system through special solar deals and feed-in tariffs (FiT). Feed-in tariffs are a form of rebate whereby customers are compensated a few cents for every unused kilowatt-hour (kWh) of electricity exported to the energy grid.

Can I join AGL's virtual power plant (VPP)?

If your home has solar panels on its roof connected to a solar battery, you could be eligible to join AGL's Virtual Power Plant (VPP). By combining with other solar battery owners, you can earn extra money off your power bills, in addition to AGL's standard solar feed-in tariffs.

Does AGL still offer solar installation services?

AGL no longer provides installation services to residential customers, but the retailer still wants to attract households that have solar panels. Solar customers in Victoria, South East Queensland, New South Wales and South Australia can sign up to AGL's special deal called 'AGL Solar Savers'.

What is AGL & how does it work?

AGL provides electricity and natural gas to nearly four million customers nationwide. It also helps customers get started with solar and offers special deals to help households make the most out of their investment. So, if you're in the market for solar, Canstar Blue has put together this guide on AGL.

Does AGL offer a solar Bill credit?

If you have solar panels and a compatible solar battery, AGL will give you a \$100 signing-up credit for joining its VPP, followed by an ongoing quarterly bill credit. These quarterly credits are on top of the solar feed-in tariff you get when you supply energy back to the grid.
