

Does AKG make a replacement transformer for a c12vr?

AKG underestimated the load and undersized the transformer (I think solidtube and the c12vr uses the same power transformer) btw AKG made a replacement transformer but it is not available anymore as they are closed. I think a simple toroid can be made as substitution. AKG [not-so]Solid Tube.

Will AKG reimburse my shipping cost?

An established company such as AKG should work with you, and most likely reimburse your shipping cost. As long as you talk reasonable, and hit those main points they will most likely pay more attention to this claim. Of course you are going to need to speak directly with the manager, that's the best approach to fix such a pain in the ass situation.

How do I remove a polarized AKG capsule?

You can even remove the film from the backplate by sanding it off, and turn the capsule into a regular, non electret one. Sometimes you can just turn the backplate around and use the side that's not pre polarized. Take care if you disassemble Akg capsule. It uses screws internally to tune the response.

Klein & Hummel UE-100 Tube EQ: KH\_UE100\_equalizer.pdf - Thanks to Zebra50! Klein & Hummel UE-1000 Discrete EQ: ... AKG SolidTube schematic (Electret!) AKG C414 (The old version) AKG C414B-TL AKG ...
