

Does Akon have a solar power project?

Akon is the brand; he has made remarkable contributions in the music industry. He has now taken his brand beyond his art to power Africa with solar energy. The news of the project grabbed global attention, helping Akon to get marketing opportunities.

What is Akon Lighting Africa?

Akon Lighting Africa was born out of a conversation a few years ago. The initiative is designed to bring attention to the issue of energy poverty in Africa and the massive need for increased generation. Its current focus is on demonstration projects of solar street lamps and home solar kits in several countries.

Is rap star Akon launching a solar power business?

Recognizing the opportunities lurking in the renewable energy market, the world-renowned rap star, Akon, has started a solar power business that aims to bring electricity to millions of people in the continent of Africa.

Why is Akon Lighting Africa so controversial?

In large part because of his fame, the roughly two-year-old Akon Lighting Africa initiative has drawn a lot of media attention, but also generated a fair amount of curiosity and skepticism. Some of the criticism seems to stem from a lack of understanding of its brand and purpose.

How many people are impacted by Akon Lighting Africa?

Akon Lighting Africa says it has reached more than 1 million people to date, which does not directly translate to 1 million more people with energy access. The number is calculated as the total of those impacted through their projects -- for example citizens of a town or village that now has street lamps.

Why did Akon not get support from the government?

In the beginning, Akon faced formidable hurdles in receiving active support from the governments. They did not understand the concept of his project and its usefulness. This is because in 2014, producing electricity using solar power was a new and costly idea in Africa.

Artist and R&B singer Akon took fans and the business industry by surprise in late 2015 when he announced his vision to bring solar power to millions of Africans living without electricity.
