

Should Puerto Ricans switch to solar energy?

For many advocates and experts, the answer is not to repair the existing grid but to wean Puerto Ricans off the fragile energy system entirely. Transitioning to mostly solar energy, they argue, is the best way to ensure islanders have the power they need to continue with their daily lives.

Is solar energy the cheapest way to provide energy to Puerto Rico?

"The fact right now is that solar energy is the best way, the easiest way and the cheapest way" to provide energy to Puerto Rican communities, said Jonathan Castillo Polanco, director of green energy for the Hispanic Federation in Puerto Rico.

Are solar panels a 'bottomless pit' for Puerto Ricans?

Solar panels and batteries such as these, Gaskins said, are critical to help ensure Puerto Ricans are not at the mercy of their weak grid, which he described as "a bottomless pit."

How many rooftop solar installations are there in Puerto Rico?

Before Hurricane Maria, there were maybe 9,000 rooftop solar setups in Puerto Rico, according to Rúa-Jovet, and most weren't connected to batteries. "After Maria, solar is basically universally installed with storage," he said. "It was really a paradigm-shifting event." New installations have grown from a few hundred a month to more than 3,000.

Did Puerto Rico turn to solar power?

With a Crippled Energy Grid, Puerto Rico Turned to Solar Power. (Spoiler: It's Working) - CNET With a Crippled Energy Grid, Puerto Rico Turned to Solar Power. (Spoiler: It's Working) After Hurricane Maria devastated the island, residents launched community-based solar projects to keep the lights on.

Does Puerto Rico have solar?

(And that doesn't include smaller systems that aren't hooked up to the grid.) Puerto Rico is especially well positioned to embrace solar: Studies suggest it receives enough sunlight to meet its residential needs more than four times over.
