

Does Akon have a solar power project?

Akon is the brand; he has made remarkable contributions in the music industry. He has now taken his brand beyond his art to power Africa with solar energy. The news of the project grabbed global attention, helping Akon to get marketing opportunities.

Is rap star Akon launching a solar power business?

Recognizing the opportunities lurking in the renewable energy market, the world-renowned rap star, Akon, has started a solar power business that aims to bring electricity to millions of people in the continent of Africa.

What is Akon Lighting Africa?

Akon Lighting Africa was born out of a conversation a few years ago. The initiative is designed to bring attention to the issue of energy poverty in Africa and the massive need for increased generation. Its current focus is on demonstration projects of solar street lamps and home solar kits in several countries.

Why is Akon Lighting Africa so controversial?

In large part because of his fame, the roughly two-year-old Akon Lighting Africa initiative has drawn a lot of media attention, but also generated a fair amount of curiosity and skepticism. Some of the criticism seems to stem from a lack of understanding of its brand and purpose.

How many people are impacted by Akon Lighting Africa?

Akon Lighting Africa says it has reached more than 1 million people to date, which does not directly translate to 1 million more people with energy access. The number is calculated as the total of those impacted through their projects -- for example citizens of a town or village that now has street lamps.

Who is Akon & what is he doing in Africa?

Akon is not the first to implement this idea in Africa, but with a credit line of USD 1 billion, several lucrative partnerships and his worldwide fame, his project has grown rapidly. It is considered to be the biggest initiative the continent has seen till date as it promises to provide electricity to 600 million Africans.
