

How much does Alabama Power charge for solar panels?

The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity. The PSC also approved Alabama Power's request to increase the fee from \$5 per kilowatt per month to \$5.41 per kilowatt per month.

Is Alabama's solar fee about to go up?

In fact, that solar fee, one of the highest in the nation, is about to go up. The Alabama Public Service Commission on Tuesday granted Alabama Power's motion to dismiss a challenge to the fees it charges residential customers who use solar panels or other methods to generate their own electricity.

Why does Alabama Power charge a fee for rooftop solar?

Alabama Power charges a fee for rooftop solar because if a customer's panels don't provide enough energy, the utility is still responsible for providing backup electricity. According to Alabama Power spokesman Michael Sznajderman, "There is a cost to have backup power service available to customers who demand it."

What are solar customers in Alabama paid for their solar energy?

Solar customers in Alabama get paid a lot less for making solar energy than customers in other states. On top of that, Alabama solar customers are paying for backup power in their regular bills, and paying an extra backup power fee.

Why is Alabama implementing a solar fee?

Green energy groups argue that the solar fee is a significant barrier to solar adoption in Alabama. This fee is one of the reasons why Alabama ranks 48th out of 50 states in residential solar capacity, according to Wood Mackenzie and the Solar Energy Industries Association.

Is Alabama Power charging solar customers twice?

Alabama Power maintains that it is not double-charging solar customers. It states that it is merely covering backup costs. However, critics argue that an alternative payment option without the backup fee ends up being even more expensive.
