

Should Alabama pay for solar panels?

Instead of incentivizing solar installations,Alabama allows its largest utility,Alabama Power,to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy,Alabama allows its largest utility,Alabama Power,to pay pennies on the dollarfor it.

How much does solar cost in Alabama?

In Alabama,the average monthly savings of a 6-kW solar system are around \$90. However,with a \$30 monthly fee,your net benefit from solar is reduced by one third. Currently,Alabama Power's rate PAE and rate rider RGB mean that a solar purchase won't pay back its initial investment until after 15 years.

What is a solar tax abatement in Alabama?

In Alabama,a solar tax abatementis a property tax exemption for owners of qualifying renewable energy facilities. The abatement can exempt property tax on the additional value added to a home by a solar installation,for periods of 10 or 20 years,depending on the jurisdiction.

Does Alabama offer a solar rebate?

Unfortunately,Alabama does not offer any cash rebates for solar panels.

Does Alabama Power offer a Rate PAE?

If you get electricity service from Alabama Power,you can sign up for their special Rate PAE(Purchase of Alternate Energy). This isn't exactly an 'incentive',but it does help solar panel owners save money in the long term. Under Rate PAE,your solar panels will reduce your bill in two ways.
