

What is the best Alabama solar incentive?

The best Alabama solar incentive is the Federal tax rebate program. This is the only option that will help you save thousands of dollars on the cost of your solar installation in the state of Alabama.

Does Alabama have solar power?

Alabama ranks No. 35 among states in terms of total solar power, mostly thanks to a handful of large projects, such as the Walmart-funded solar farm in Chambers County, and installations at military bases.

Should Alabama pay for solar panels?

Instead of incentivizing solar installations, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

How much does solar cost in Alabama?

In Alabama, the average monthly savings of a 6-kW solar system are around \$90. However, with a \$30 monthly fee, your net benefit from solar is reduced by one third. Currently, Alabama Power's rate PAE and rate rider RGB mean that a solar purchase won't pay back its initial investment until after 15 years.

Can you save money on solar in Alabama?

We've also listed several tax incentives and rebates to help you save money on your solar power system. The state of Alabama does not currently have a state incentive to help you save money on your energy consumption, but there are federal and some local programs that can help lower total costs. Why Go Solar in Alabama?

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for it.

Alabama PSC Raised the Solar Tax that Alabama Power can collect, Sparking Lawsuit. In 2020 the Alabama Public Service Commission unanimously voted to raise Alabama Power's solar tax from \$5.00 per kilowatt to \$5.41 per kilowatt.
