Is Alabama a good place to install solar panels?

Being located in the deep south, Alabama experiences mild winters and harsh summers, with an abundance of sunny days. On average, Alabama has 213 sunny days per year and about 5 peak sun hours each day. All that sun means solar panels can generate more power here than in other parts of the country, meaning you can install fewer solar panels.

How do I become a solar installer in Alabama?

Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Alabama, those who wish to become solar installers can obtain an Electrical Contractor or Journeyman Electrician's license.

Do solar panels generate more power in Alabama?

On average, Alabama has 213 sunny days per year and about 5 peak sun hours each day. All that sun means solar panels can generate more power here than in other parts of the country, meaning you can install fewer solar panels. If you choose reliable installers, you can trust that these estimates will be as accurate as possible.

Do solar batteries make sense in Alabama?

Solar batteries make more sense here because you can use the excess power stored in your batteries to lower your bill rather than selling it back to the grid for a lower price. Energy storage can also give you peace of mind during a power outage. Here are some Alabama companies that install panels and solar battery storage systems:

Is solar energy a good idea in Alabama?

Alabama's electricity rates are lower than the United States average, but its residents consume 31.45% more energy than most American households. This usage translates to energy bills about 26.17% higher than usual. Going solar can help residents tap into more affordable renewable energy, reducing their average utility bill spending.
