

What are the solar panel laws in Alabama?

If you have a better understanding of solar panel laws in Alabama, you'll be able to make an informed decision about what you want to do next. According to federal requirements, every state must offer net metering to people that have solar panels installed. However, in Alabama, there are no statewide policies regarding net metering.

Should Alabama pay for solar panels?

Instead of incentivizing solar installations, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for excess energy generated by solar installations. This policy results in solar panel payback times being nearly the worst in the nation.

Is Alabama a good state for solar panels?

In many ways, Alabama is an ideal state for solar panels. After all, Alabama sees plenty of sunshine year-round. However, residents of the state primarily use natural gas, coal, and nuclear energy. Biomass and hydroelectric power are also very popular in this state.

Why does Alabama Power charge a fee for solar panels?

The PSC echoed Alabama Power's position that the fee is necessary because otherwise solar customers would not be paying their fair share of the costs of all the power plants, lines and poles that are needed to deliver power to their house when their solar panels aren't producing.

How much does rooftop solar cost in Alabama?

Alabama Power, which supplies power to much of Alabama, charges customers with rooftop solar a monthly fee of \$20-32 for an average-sized system. If the fee is found to violate federal law, some advocates believe Alabama would see a surge of rooftop solar installations, as the state catches up to the rest of the nation.

How does Alabama compensate for excess solar energy?

Instead of paying the full price for excess solar energy, Alabama allows its largest utility, Alabama Power, to pay pennies on the dollar for it.

The fees, \$27 per month on a 5kW solar system, are charged to customers who are hooked up to the Alabama Power grid but also use solar panels to generate a portion of their electricity. Alabama Power has ...
