

Alice Springs Airport (ASP) will add more than 1,000 solar panels to its already substantial PV installation.. To cost \$1.9 million, the latest project will boost the airport's on-site clean power generation capacity by around 40% ...

Territory Generation is the largest electricity producer in the Northern Territory. We own 617.3 MW of installed capacity and contract an additional 5.1 MW from independent power producers, including 4 MW of solar power from Uterne in ...

The Yulara Solar System is a distributed 1.8 MW solar PV plant in Uluru (Ayers Rock), Central Australia. Single Technologies (full data set with weather data) 0MB CSV Download

The DKASC is located at the Desert Knowledge Precinct in Alice Springs, a town in the Northern Territory that enjoys one of the country's highest solar resources in an arid desert ...

U.S. based solar panel manufacturer Sunpower has announced the completion of Australia's largest solar farm to use a solar tracking system. The the 1-megawatt (MW) Uterne ...

SolFocus is working with developer Ingenero to install a 235-kilowatt power station using 28 SolFocus Concentrating Photovoltaic (CPV) solar arrays to furnish solar power at Alice...

Minister for Climate Change and Energy Efficiency, Senator Penny Wong, yesterday announced \$1.132 million in funding for a \$2.264 million solar farm project at Alice Springs Airport. Skip to ...

Alice Springs Airport is expanding its existing solar power facilities, with construction of a new 325kW PV system. The project, valued at \$1.9 million, includes the ...

The second of five large-scale iconic projects for Alice Solar City, the Alice Springs Airport Solar Power Station will deliver approximately 28% of the airport's electrical demand.

The Bureau of Metereology (BOM) logs the amount of sunlight that shines on the Alice Springs airport. It's called "global solar exposure" which is the total amount of solar ...

The airport's solar power station project uses new Concentrator Photovoltaic (CPV) technology that will supply about 28 per cent of the airport's energy needs. Concentrator Photovoltaic ...

Alice Springs Airport is adding 325kW solar PV capacity to its existing 235kW of renewable energy power generation. Skip to content. 1800 362 883

Alice Springs currently features 122 MW of gas and diesel generators at the Owen Springs and the older Ron Goodwin facilities, the 3.8 MW Uterne solar facility, and 23 MW of rooftop solar, in a ...

The airport's solar power station project uses new Concentrator Photovoltaic (CPV) technology that will supply about 28 per cent of the airport's energy needs.

The NT Solar Resource portal gathers high quality data on a range of irradiance and climate parameters at 5-second resolution, sampled at 1-second frequency from ground-based ...

The 235 kW tracking system installed in 2010 at the Alice Springs Airport, which incorporated SolFocus technology to concentrate the sun's energy in a first for the southern ...

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days at Alice Springs Airport varies throughout the year. The wetter season ...

The DKASC, Alice Springs contains a range of solar technologies operating at the Desert Knowledge Precinct in Central Australia. Single Technologies (full data set with weather data) ...

A 10-megawatt solar power station is also in the pipeline for Alice Springs Airport. NT Treasurer Nicole Manison said the initiative would help the Territory reach its target of 50 per cent solar ...

Minister for Climate Change and Energy Efficiency, Senator Penny Wong, yesterday announced \$1.132 million in funding for a \$2.264 million solar farm project at Alice ...
