## **SOLAR PRO.** Alice springs solar power station

How much solar power does Alice Springs have?

Alice Springs currently has 122 MW of gas and diesel generators and 3.8 MW of solar powerfrom the Uterne solar facility, along with 23 MW of rooftop solar.

Will Alice Springs Solar City get solar power?

The final solar PV installation in the Alice Springs Solar City project is approaching completion, bringing the installation phase of the project closer to a conclusion. With the completion of the 162kW rooftop solar installation, 3% of the city's electricity needs will be met by solar power-one of the highest levels in Australia.

What was the largest solar facility in Alice Springs?

Alice Springs has had a relatively high take-up of rooftop solar - one quarter of all homes - and is host to what was once (in 2012) the largest ground mounted solar facility in the southern hemisphere, the 3.8 MW Uterne solar plant.

Why do Alice Springs residents want rooftop solar?

The consistent enthusiasm of Alice Springs residents for rooftop solar is driven by their interest in storing energy for later use and providing other services crucial to power system operation. This enthusiasm is accelerating the need to provide extra support to the electricity network.

Will Alice Springs' Araluen Arts Centre have a solar system?

The system, which will cover all the suitable roof space of Alice Springs' Araluen Arts Centre, will produce enough electricity annually to power 36 homes. The Centre will see significant electricity bill savings by consuming the power produced by the solar system during the daytime, and only purchasing power from the grid after the sun goes down.

How many solar panels are in Alice?

Alice's solar installation, built by Sunpower Australia, consists of 3,048 ultra-efficient mono-crystalline panels.

The Alice Springs meteorological station is located at the Desert Knowledge Precinct, approximately six kilometres south of the centre of Alice Springs and midway between the town centre and airport. This ground-based station ...

Alice Springs Airport currently receives approximately a quarter of its power needs from its existing 235kW solar power station which was completed in 2010. The additional 996 ...

operate the power system at 50% renewable energy. From there, the scope was developed, Project Partners confirmed, and funding sought. Alice Springs Future Grid describes a series ...

Alice Springs" quest to create a sustainable energy future has been boosted with the launch of the
