How many solar panels do I need for a 24/7 inverter?

If you wish to have your inverter on 24/7, you will need at least 400 watts of solar panels attached to your system to offset the loss. Because the idle consumption is high on these all-in-ones, you may want to invest in a victron or xantrex (but they will cost 3x-5x as much money).

Are the DIY solar panels UL certified?

The DIY battery community has used these units 24/7 for years, and they are now UL certified as of 2021. This means that the components inside the units are high quality. Connect some batteries and solar panels, change the settings, and you are done.
