What is a solar laptop charger?

A solar laptop charger isn't typically something you can carry in your purse. Most solar chargers have 60W to 100W panels, so the voltage gets high enough to charge your computer. Most panels receive testing under laboratory conditions, so they'll never reach their peak wattage when you have them out in the real world.

Do you need a solar laptop charger?

Not every solar panel charger manufacturer provides adequate DC connectors to every type of laptop. You also have to ask yourself, why are you considering buying a solar laptop charger in the first place. Chances are if you require a solar charger for your laptop, you could probably use the same charger for other devices too.
