## Almost free solar power

Are there free solar panels?

Solar power is something everyone on the planet gets for free. However,the process of turning it into usable energy is expensive. While the cost of solar panels is slowly decreasing,many homeowners still can't afford them. That's why some companies are advertising "free solar panels." In reality,there is no such thing as free solar panels.

Does the federal government offer free solar panels?

The federal government does not provide free solar panels,but does provide incentives that reduce the cost of going solar. You can go solar with no upfront cost by taking out a \$0-down loan, signing a lease or PPA, or subscribing to a community solar farm. Of the no upfront cost solutions, \$0-down loans provide the best long-term savings.

Should I get a \$0-down solar loan?

If you don't want to spend any money upfront, financing your system with a \$0-down solar loan is usually your best option. "Free solar panels" aren't free; typically, these programs refer to solar leases or PPAs. The federal government does not provide free solar panels, but does provide incentives that reduce the cost of going solar.

Can you go solar with no upfront cost?

You can go solar with no upfront costby taking out a \$0-down loan, signing a lease or PPA, or subscribing to a community solar farm. Of the no upfront cost solutions, \$0-down loans provide the best long-term savings. If you can purchase your system outright, you'll see the highest return on investment overall.

Should you go solar through a company making a 'free solar' claim?

Going solar through a company making " free solar " claims could instead reduce your long-term return on solar panels and perhaps worse, sour you on the idea of clean energy altogether. " No-cost solar " offers usually refer to solar leases or power purchase agreements (PPAs).

Should you install free solar panels on your property?

Installing "free" solar panels on your property comes with multiple nuances. While you may not incur upfront costs, you will still have to pay later. Here's how it works. Solar power is something everyone on the planet gets for free. However, the process of turning it into usable energy is expensive.
