

What can you charge with a solar power bank?

A solar power bank can charge devices that can be charged via USB. Solar panels can typically still be used to charge power banks that don't have solar inputs, but you may need to get a third-party adapter to go from your panel to the USB.

How do solar power banks work?

Out in the wilderness, whether it's just a long walk or a full hike, there are no outlets you can rely on to charge your devices. That's where solar power banks come in. While some can get power from being charged themselves, the main appeal is their ability to turn sunlight into electricity to keep your phone and other items topped up.

Is a solar power bank worth it?

A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. . The last thing you want with a power bank is for it to be slow to charge itself and slow to charge your devices, but the four panels on this one make it super efficient and speedy.

What is the best compact solar power bank?

The Sherpa 100AC from Goal Zero is our top pick for the best compact solar power bank. Weighing just 2 pounds and small enough to fit in a jacket pocket, it has an impressive capacity of 95Wh, which is enough to charge a laptop two times and a phone several times.

Is a solar power bank useless?

A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. .

What is the typical capacity of small solar power banks?

The capacity of small solar power banks is usually rated via milliamp hours (mAh). Typically, you'll need around 3,500mAh to charge a phone once.
