

Is Ameren acquiring or building 550 megawatts of solar energy?

ST. LOUIS, June 20, 2023 / PRNewswire / -- Today Ameren Missouri, a subsidiary of Ameren Corporation (NYSE: AEE), announced it intends to acquire or build approximately 550 megawatts (MW) of solar energy, continuing the company's investment in renewable generation.

When will Ameren start generating solar energy?

Ameren Missouri plans to start generating solar energy from the new facility by the end of 2024. The company pledged to add 900 megawatts of solar and wind energy to the grid in its integrated resource plan on file with Missouri regulators.

Will Ameren Missouri keep up with ambitious solar investments?

It's uncertain whether Ameren Missouri will keep up with ambitious goals for investments in renewable energy over the next few years. Ameren is working to purchase a solar farm under development in southern Illinois for use by its Missouri customers, marking its largest solar facility acquisition to date.

How many solar farms will Ameren Missouri have in 2026?

Ameren Missouri plans to add four solar farms in the coming years capable of producing enough energy to power 95,000 homes. (Photo courtesy of Ameren Missouri) Ameren Missouri plans to open four solar farms by 2026 capable of powering a combined 95,000 homes, the company announced Tuesday.

What are Ameren's new solar farms?

The four solar farms are a leap forward in Ameren's plan to add a combined 2,800 megawatts of wind and solar power by the end of 2030. The additions are meant to help Ameren reach its target to reduce its carbon emissions by 60% by 2030, compared with 2005 levels. It hopes to reach 85% reduction by 2040 and net-zero emissions by 2045.

Who owns Ameren electricity?

Ameren, as the sole distributor in its service region, distributes electricity to 1.2 million customers and natural gas to 100,000 customers. Ameren has generating capacity of around 5 million net kilowatt of primarily coal-fired power, most of which is owned by Ameren Missouri. The holding company distributes electricity.
