

Should you use an answering service for solar power companies?

While putting out fires over the phone is certainly one strategy for handling customer needs, it's not exactly great for productivity. An answering service for solar power companies can help route calls to the appropriate person, ensuring that your time isn't spent acting as a switchboard operator.

Why should you use a solar energy answering service?

When it comes to setting yourself apart from them, customer service can make all the difference. A solar energy answering service is the answer for your administrative challenges, allowing you to step away from the ringing phone and out into the field with your team.

Does solar power NSW have an answering service?

I purchased a solar system from Solar Power NSW in May 2011, and it has since broken down twice. On each occasion, when I called the office of Solar Power NSW, I was told by the receptionist this was an answering service, and that my query would be passed onto a staff member who would call me back.

Who provides better customer service services for the solar industry?

No one else in the customer service industry provides better support services for the solar industry. From sales support to engineering, to customer care, we support the entire customer journey. We are committed to taking the hassle out of the back-office functions relating to getting solar and other renewables installed.

Why do solar companies need a call center?

There's no better way to ensure quality control. A call center for solar companies is the perfect answer to so many of the most common administrative challenges. Help your employees keep their focus on the most important tasks on their to-do lists by having only the most important calls forwarded to them.

Why do solar companies need a support system?

Solar companies need a support system for their processes, employees, and clients. ClearSource prepares price estimates for sales staff in the field, designs solar installations, and handles customer support after the sale. ClearSource is the only BPO providing this depth of support to the renewable energy sector.
