

Can you lease a solar panel system?

Also, you'll need to connect to the electricity grid to be compensated for the excess energy your panels produce. When you lease a solar panel system, you can use the power it produces, but a third party owns it. You then pay that company to lease the equipment.

Can solar panels power a home during a power outage?

Typically, solar panels supplement your electric service and cannot operate independently of the electric grid unless it's specifically designed to provide back-up power. For safety, most solar panels shut-off during an outage, so they may not power your home during a service disruption.

Do you pay a company to install a solar panel?

You then pay that company to lease the equipment. When you purchase a system, you pay up front to install and own the panels, or finance the purchase and pay the costs of the equipment plus interest over time (typically 7-20 years). You're also responsible for maintenance and repairs.
