

Will I get an APS bill if I install solar panels?

Yes, you will still get an APS bill if you install solar panels. APS credits excess energy at a rate lower than the retail rate, which means it will not fully cover the costs of future energy usage. There may also be fees and charges that cannot be offset by solar.

What is APS net billing?

APS (Arizona Public Service) is running a net billing program that helps solar-qualified homeowners save money by sending excess energy to the local power grid. If you're one of the 1.2 million APS customers, continue reading to learn more about this program and how you can join and save.

Does APS offer solar incentives?

APS does not offer any solar incentives and rebates to its customers. However, Arizona has a solar tax credit that equals 25% of system costs up to \$1,000. The Arizona tax credit can be used in addition to the 30% federal solar tax credit, resulting in thousands of dollars in tax savings.

How do I contact APS?

If you have questions, contact us at claimservices@apsc.com or (602) 371-7171. If you see a downed power line or exposed electrical equipment, please stay at least 100 feet away from the hazard and call 911. Then, call APS at (602) 258-5483 or (800) 253-9408. We are here to help, feel free to contact us through live chat, by phone, email or mail.

What happens after APS approves a solar system?

After receiving the final documentation, APS will schedule a time for an inspection to make sure that the solar system matches the approved plans. While there, APS will also install a special electric meter that allows you to take part in their net billing program.

How do I join the Arizona Public Service solar program?

To join the Arizona Public Service solar program, your solar provider can help you with the APS solar interconnection application online. You must submit the form along with an authorization and an electrical three-line diagram.
