

What are solar-powered watches?

Solar-powered watches, as the name suggests, are watches that use solar energy to power themselves. The batteries of these watches charge via the usage of solar power or any light source, so they're always in working condition regardless of the situation. Designed for a variety of situations and lifestyles.

Where do solar-powered watches come from?

The third widely available source of solar-powered watches comes from Casio. The brand has named the technology Tough Solar, implying the ultra-durable construction of Casio watches. The power reserve of Casio solar watches depends on the use of various functions, but it stays mostly around six months.

What is a solar watch?

But first off, what exactly is a solar watch? A solar watch is a timepiece that uses light energy to power its movement. The watch has a small solar panel on the face that absorbs sunlight and artificial light and converts it into electrical energy. As a result, this energy is used to power the watch movement and keep it running.

Are solar-powered watches worth buying?

As more people embrace the power of solar watches, you can expect them to become more common. In the meantime, there are plenty of solar watches to choose from, including options from brands like Casio, Citizen, Seiko, and even TAG Heuer's new solar-powered Aquaracer.

Which smartwatch is solar-powered?

The Garmin Fenix 7X Solar is a solar-powered smartwatch. It is the bigger version of the Garmin Fenix 7 Solar and comes with several added features, including a 1.4" solar-charged touch display.

How do solar watches function?

Solar watches work by converting light into energy to power the watch. The type and intensity of light affect charging speed. For example, sunlight charges the watch faster than artificial light.
