

Who is Arcadia Power?

Arcadia Power is one of the largest community solar companies in the US. They aim to help Americans who can't install solar panels directly on their homes to benefit from renewable energy through community solar projects.

Is Arcadia a solar power company?

Arcadia (formerly Arcadia Power) is not a power company or energy supplier, as it doesn't generate or sell electricity. Instead, Arcadia connects you to local solar farms and applies credits from those farms to lower your utility bill. Arcadia assigns you a share of a nearby solar farm's output when you sign up.

How does the Arcadia Power Community Solar Program work?

Each customer purchases or rents a portion of the solar array sufficient to meet their monthly or annual electric demand. The Arcadia Power community solar program guarantees a reduced energy bill, requires no long-term commitment, and integrates with utility billing systems so you only pay a single bill per month.

Does Arcadia Power pay for solar panels?

Arcadia Power does not pay for solar panels. Instead, it offers community solar subscriptions. Participating utilities buy solar energy from Arcadia, which sells subscriptions to consumers and buys energy from solar farms. In some states, consumers pay Arcadia, which then pays the utility and the farm on their behalf.

Does Arcadia offer community solar?

The clearest benefit of Arcadia's community solar program for residential customers interested in solar is the ability to cancel at any time. You no longer need to sign a 20-year contract, risk a termination fee, or be obligated to transfer the commitment to the next tenant in a rented apartment.

Are low-income people eligible for Arcadia solar?

Arcadia Power's community solar program offers benefits to a wide range of customers. In some states, low-income individuals may qualify for even better rates. The most tangible benefit for most Arcadia subscribers comes in the form of guaranteed savings on their utility costs without having to sacrifice a stable energy source or set up an expensive solar system on a residence. It's also a way to support more renewable energy.

The energy that is produced by the solar projects is sent back to the local grid. Each Arcadia customer that's enrolled in our Community Solar program will receive a percentage of the total ...
