

Are solar power contracts approved by the puc

Will Pennsylvania buy 25 MW of solar energy?

The agreement to purchase 25 MW of solar energy means that the utility will need to put out a request for proposal, or RFP, to solicit a solar developer in Pennsylvania. "This is locally produced solar," he said. "We're not buying it from Arizona."

Why did PECO resubmit a new energy plan to the PUC?

PECO spokesman Brian Ahrens said the utility listened to the testimony of all the intervenors before adjusting the plan and resubmitting it to the PUC, which approved the plan Thursday. "This new program is our way of working to ensure that we're purchasing energy at the least cost possible over time," Ahrens said.

Will PECO add 25 megawatts of solar energy?

PECO has agreed to add 25 megawatts of solar energy to its mix of sources that generate electricity for customers in southeast Pennsylvania, which is enough to power 3,000 homes. The plan would create the largest solar procurement by a utility in Pennsylvania serving "default" customers, or those who do not opt to buy from a third-party provider.

Does Peco produce solar energy?

PECO does not produce the energy it provides, but purchases it from suppliers. The agreement to purchase 25 MW of solar energy means that the utility will need to put out a request for proposal, or RFP, to solicit a solar developer in Pennsylvania. "This is locally produced solar," he said.

Are 3rd-party solar PV PPAs legal?

Note: Authorization for 3rd-party solar PV PPAs usually lies in the definition of a "utility" in state statutes, regulations or case law; in state regulatory commission decisions or orders; and/or in rules and guidelines for state incentive programs. This information is provided as a public service and does not constitute legal advice.

How often is PECO required to submit a power purchasing plan?

PECO is required every four years to submit its power purchasing plan to the PUC. Known as the default service program, it details the utility's procurement, implementation and contingency plans for generating electricity for its customers over a four-year period.

o Site purchases electricity through power purchase agreement (PPA) o Pros - Renewable developer (or partner) eligible for tax incentives, accelerated depreciation
