

# Are there still government rebates for solar power

Where can I get a solar energy rebate?

Utility rebates are offered by electric utility companies to encourage homeowners to install solar panels or other solar energy technologies on their properties. Homeowners can receive these rebates directly from their utility provider.

What are the most popular solar incentives & rebates?

The federal solar tax credit, also known as the solar investment tax credit (ITC), is one of the most popular solar incentives and rebates currently available. It incentivizes homeowners to purchase a solar power system by reducing the amount of federal taxes owed. Here are eight of the most popular solar incentives and rebates.

Is the federal solar tax credit back to 30%?

The federal solar tax credit is back to 30%, and there's never been a better time to install solar and start saving on energy costs. On August 16, 2022, President Biden signed the Inflation Reduction Act (IRA) of 2022 into law, immediately activating the Residential Clean Energy Credit for solar, battery storage, and more.

Can you get a solar tax credit if you add a battery?

The Residential Clean Energy Credit also applies to battery storage, and can be claimed if you add battery to an existing solar system or -- as of January 1, 2023 -- on its own. The Inflation Reduction Act has extended the 30% solar tax credit to 2032. Here's what that means and how to take advantage of it.

What is a solar panel rebate?

A solar panel rebate is a dollar-for-dollar reduction in the cost of solar, usually paid directly to installers and passed along as savings to the consumer. States, utility companies, and solar panel manufacturers offer rebates that in most cases immediately reduce the cost to install solar panels.

What is the solar tax credit?

In an unexpected yet welcome move, the Inflation Reduction Act of 2022 increased the solar tax credit to 30% and extends it until the end of 2032. This is huge news for homeowners, as this tax credit -- officially known as the Residential Clean Energy Credit -- is the greatest financial incentive available for solar and battery storage projects.
