

Is Oregon a good state for solar power?

Oregon currently ranks 18th in the country for growth in solar power generation since 2013. Oregon came in 21st in growth in wind power, 16th for growth of battery storage capacity, 16th for growth of sales of electric vehicles and (a disappointing) 44th in growth of energy savings, as compared to other states.

What is solar energy in Oregon?

Solar in Oregon Solar energy is radiant light and heat from the Sun. Solar technologies harness this energy for electricity generation, space and water heating, and other uses. Solar energy is a renewable resource as the energy comes from the sun.

How do I view solar energy development trends in Oregon?

Press the arrow button, dropdown menu, or move the slider to change the year. Click on the tabs along the top of the dashboard to show solar energy development trends. About the Project The Oregon Department of Energy developed the Oregon Solar Dashboard in partnership with regional utility, solar industry, and community partners.

How many kilowatts can a solar array produce in Oregon?

Joining panels together creates solar arrays, which can be virtually any size, from less than one kilowatt to hundreds of megawatts or more. Learn more about energy in Oregon in our 2022 Biennial Energy Report. Check it out: ODOE's Oregon Solar Dashboard shows how sun-powered electricity has developed over time across the state.

How many watts is a solar panel in Oregon?

The average solar panel has between a 200- and 400-watt capacity. Joining panels together creates solar arrays, which can be virtually any size, from less than one kilowatt to hundreds of megawatts or more. Learn more about energy in Oregon in our 2022 Biennial Energy Report.

What is Oregon's largest solar farm?

In November, the Oregon Energy Facility Siting Council, a board that oversees the siting of large energy facilities, approved the state's largest solar farm - and one of the country's largest - on about 10,000 acres of active farmland in Morrow County. It's one of several multi-thousand acre solar farms poised to be built in Oregon.

Although the Pacific Northwest is no stranger to a cloudy day, solar energy still works well here. The Portland/Vancouver area actually gets just as much solar energy annually as the U.S. ...

Some areas in Oregon see more than 5 times the national average for annual rainfall. A roof leak warranty is a great piece of coverage to prioritize when looking for the best solar company in Oregon. ... Sunlight Solar ...

Oregon's Energy Facility Siting Council has granted final approval to developer Obsidian Renewables LLC. to begin construction on the proposed Obsidian Solar Center, the largest solar project in oregon and the Pacific ...

Oregon Solar Dashboard; Oregon Electric Vehicle Dashboard; Oregon's Electricity Mix; ... and use the map tools to zoom in and move around specific area. ... About the Electri city Resource Mix. The Oregon Department ...

However, if you have a battery-backed off-grid solar energy system, then you will still be able to produce and use solar energy during a temporary or prolonged grid power outage. Conclusion In conclusion, the exact amount of ...

To lighten the financial burden of installing either standalone solar energy systems or combined energy storage systems (home solar power coupled with battery backup). This rebate can ...

The average monthly solar radiation level in Oregon's capital city, Salem, of 4.2 kilowatt hours per square meter per day (kWh/m²/day) is approximately 7% greater than the average level of ...

The most popular financial incentive offered by Oregon for solar homeowners is the state solar tax credit. The Oregon solar power tax credit is one of the most attractive in the country and offers homeowners \$1,500 per kW of ...

, our in-house solar experts and engineers have built one of the most accurate solar calculators available. Homeowners can use our solar calculator tool without inputting any personal information, so they can evaluate the ...

Solar is one of the most easily accessible forms of renewable energy for Portland homes. Transitioning to solar energy can reduce your monthly energy expenses and shrink your ...

fhm/Moment/Getty images. Last updated April, 2025. Do you know where electricity comes from in your state? Depending on its location, energy can come from various sources, including nuclear, wind, and solar. There are also ...

Peak sun hours are a way of expressing how much solar energy, also called solar insolation or solar irradiance, a location receives over a period of time. Solar irradiance data is expressed in kWh/m² per day or per year. And ...

Learn more about energy in Oregon in our 2024 Biennial Energy Report. Check it out: ODOE's Oregon Solar Dashboard shows how sun-powered electricity has developed over time across the state.

The Sunstone Solar project, a 1.2 gigawatt solar and energy storage facility that would be the largest solar

power facility in the U.S., has been approved for construction in Oregon.

Considering that Portland gets an average of 270 days of sun and the total potential savings of installing solar in Portland, which is \$1,524 annually, and how many solar installations occur in ...

The state lost 4% of its agricultural area between 2017 and 2022, or about 660,000 acres, according to the 2022 Census of Agriculture, likely due to a range of factors such as rezoning into ...

Plans for a massive solar installation in Oregon's desert has cleared another hurdle. The \$500 million project would be built near Christmas Valley. The largest solar energy facility planned in Oregon got its final ...

The Oregon Department of Energy developed the Oregon Solar Dashboard in partnership with regional utility, solar industry, and community partners. The work was made possible in part through a federal grant provided ...

Solar energy can certainly be worth it in Oregon City. On average, homeowners who install solar energy systems save more than \$18,700 over the following 20 years. The average cost per watt in Oregon City is \$2.46, which is ...

But it gets even better because Blue Raven Solar is a member of the Energy Trust of Oregon Trade Ally Network, so you can qualify for additional solar cash rebates. We provide solar to many areas within and near Portland. Major ...
