

What is the cost of solar panels in Arizona?

After claiming the 30% federal solar tax credit, the price of solar panels in Arizona is \$1.85 per watt. This means the average cost of a 6-kilowatt (6 kW) system is \$15,840 before incentives and \$11,100 after claiming incentives. The cost is relatively consistent across Phoenix, Flagstaff, and Tucson.

What incentives are available for solar panels in Arizona?

An additional 30% Federal Solar Tax Credit may be applied for solar incentives that could significantly reduce the cost of solar panel installation. Net Metering is another major incentive in Arizona, although the specifics can vary between different utility companies.

Does Arizona have a solar tax credit?

Arizona is one of a few states with a state solar tax credit. The state tax credit is 25% of the total system cost up to a maximum credit of \$1,000. If your tax liability is too small, you can roll over the excess for up to five tax years.

What factors affect the cost of solar panel installation in Arizona?

How much you actually pay for a solar panel installation in Arizona depends on the size of your system, what incentives you're eligible for, sunlight exposure and other factors. A typical solar panel installation in Arizona costs \$8,204 to \$23,439.

Are there solar rebates in Arizona?

There are no statewide Arizona solar rebates, but it does have the AZ solar tax credit. Arizona's tax credit is equal to 25% of system costs up to \$1,000, and it reduces your state income tax liability. There may be local energy efficiency rebates and financial incentive programs available to you.

How much can Arizona homeowners save with solar panels?

Over 25 years, Arizona homeowners with solar panels avoid \$59,661 in utility costs on average. Abundant sunshine plus relatively low installation costs and solar-friendly policies make solar panels worth it for many homeowners in Arizona. Most Arizona solar customers we've talked to seem satisfied with their decision.
