

Could solar energy save Little Rock School District money?

Before the change in state law, switching to solar energy would have saved the Little Rock School District tens of millions of dollars; now the savings will be substantially lower, though still significant. Entergy's greed has no limits, it seems.

Why is Arkansas losing students?

The first was a very somber conversation about the budget. We've been losing students, thanks to the Republican Party of Arkansas's ongoing war on public schools. Charter schools are taking kids out of traditional schools, hurting communities. Long-term projections show fewer students and therefore less money for the Little Rock School District.

How much money will the Little Rock School District save?

This will save the Little Rock School District hundreds of thousands of dollars a year, and over 25 years should save the district between \$4.7 million and \$5.7 million. The savings will go back into the general fund and will be used to operate all our schools. All we will owe upfront is \$40,000.

Are charter schools hurting the Little Rock School District?

Charter schools are taking kids out of traditional schools, hurting communities. Long-term projections show fewer students and therefore less money for the Little Rock School District. The short-term picture looks much better. Superintendent Jermall Wright said he is confident the district will not go into fiscal distress.

Does Little Rock School District have an image problem?

It is no secret that the Little Rock School District has had an image problem for generations, and our schools have been losing students for years now. Wright and his team are committed to turning this around.

Will Little Rock School District go into fiscal distress?

Long-term projections show fewer students and therefore less money for the Little Rock School District. The short-term picture looks much better. Superintendent Jermall Wright said he is confident the district will not go into fiscal distress. Thanks to a large reserve fund balance, the district can absorb the loss in revenue for now.
