

What is Arkansas Solar Power?

Arkansas Solar Power Inc is a locally owned and operated solar installation company named 'Arkansas Solar Power'. Their goal is to bring 'Natural energy to the Natural State(TM)' by accelerating the adoption of solar technology across Arkansas. This is done to improve grid flexibility, increase environmental conservation, and reduce the carbon footprint of the state.

What are solar incentives in Arkansas?

Solar incentives in Arkansas are financial programs and policies that are designed to encourage the adoption of solar energy systems. These incentives provide financial benefits and incentives to residents and businesses in Arkansas who choose to install solar panels.

Is it worth installing solar panels in Arkansas?

Arkansas has affordable electricity rates at less than 12 cents per kilowatt-hour in June 2023 but solar panels might still make sense for your individual home energy situation. The state's plenty of sunlight, strong net metering policies, and affordable solar panel prices make the path to energy independence a little easier in Arkansas, also known as the Natural State.

Should I go solar in Arkansas?

If you're considering installing solar panels in Arkansas, we recommend doing it soon, as programs and incentives can change. While Arkansas does not have a dedicated state rebate for solar panel installation, some manufacturers like LG offer their own solar rebates. These programs are usually time-sensitive.

Is solar energy a good investment in Arkansas?

Arkansas receives an average of 4.69 hours of peak sun per day, making it great for solar energy generation. Residential solar costs have decreased by 52% in the past 10 years, and the Inflation Reduction Act passed by Congress in 2022 provides federal tax credits, arming residents with more solar buying power.

What is the largest solar project in Arkansas?

The largest solar project in Arkansas, with a capacity of 16.6 MW, is SR Camden in Camden. Completed by Silicon Ranch in 2015, this solar project has enough electric capacity to power more than 1,931 homes. (Check out our Major Solar Projects List for more notable installations.)
