

Does Arlo solar panel charge a camera?

With the Arlo Solar Panel connected to the camera and receiving average sun exposure, your camera battery stays charged, so you don't need to worry about recharging it. The solar panel is a great low-maintenance solution for outdoor camera installations in hard-to-reach areas.

How does the Arlo camera work?

It generates electricity which is output through a cable that plugs into the Arlo camera. Solar panels can power all from small electronics like a camera to power entire homes. Arlo's solar panel is a weather-resistant panel that has an adjustable mount so you can tilt it towards the sun.

Which solar panels are compatible with Arlo cameras?

The VMA5600 solar panel is compatible with the Arlo Ultra and Pro 3 cameras. It is weatherproof and connects to your camera using the included weather-resistant 8-foot (2.4 m) magnetic power cable. The VMA4600 solar panel is compatible with the Arlo Pro 2, Pro, and Go cameras.

Does Arlo vma5600 work with a 2 watt solar panel?

The 2-watt Arlo Solar Panel is designed to provide year-round trickle charging to keep your Arlo camera battery charged, not to charge your camera battery from low to full. The VMA5600 solar panel is compatible with the Arlo Ultra and Pro 3 cameras.

How do I charge my Arlo solar panel?

Your Arlo Solar Panel is designed to keep your camera battery charged, not to charge the battery from low to full. Connect the Arlo Solar Panel cable to your Arlo camera. Do not unplug the cable from your Arlo Solar Panel. This can damage the cable and the Arlo Solar Panel. The charging icon will not immediately appear in the Arlo Secure App.
