

Did Ashok Saxena tell Indian citizens solar panels would anger 'the sun god'?

In a post published on March 28 or 29 (the post has since been deleted), an Indian Facebook user and supporter of the left-wing Aam Aadmi Party claims that Ashok Saxena, an Indian MP from the right-wing Bharatiya Janata Party (the country's ruling party), told Indian citizens that if they used solar panels it would anger "the Sun God".

What happened to solar modules at 100MW solar plant in Maharashtra?

Climate Samurai, a website about climate change and the use of renewable energy, wrote a blog post about the incident and posted the video on its YouTube channel in mid-February with the title: "Solar Modules at 100 Mw solar plant in Maharashtra destroyed due to non payment of wages".

Why are Indians destroying solar panels?

A video has been shared thousands of times on social media that shows men and women taking hammers to a long row of solar panels, climbing on top of them and smashing the glass. Those sharing the video say that Indian people are destroying the panels because they think they upset their gods- but the truth is a lot more mundane.

Did the World Bank donate solar panels to an Indian village?

Its caption says that the World Bank donated these solar panels to an Indian village, and after a Hindu priest told villagers that the panels were "fighting with their gods", the villagers chose to destroy them. This particular video has racked up over 85,000 shares and been viewed over five million times. An angered Sun God?

Why did climate Samurai Smash the solar panels?

Climate Samurai reported that it was not able to get in touch with the solar plant's contractor. Apparently the workers who had built the solar plant didn't receive their wages, and so in an act of retaliation they smashed the panels - nothing to do with religion or politics.

Are commercial solar photovoltaic (PV) farms based on satellite imagery?

We present a comprehensive global temporal dataset of commercial solar photovoltaic (PV) farms and onshore wind turbines, derived from high-resolution satellite imagery analyzed quarterly from the fourth quarter of 2017 to the second quarter of 2024.
