

Are Astronergy solar panels reliable?

Tier one means banks and financial organisations are willing to lend money to large scale solar energy projects using those panels. It's not a direct measure of quality, but panels that are crap aren't going to get tier one status, so you can be confident these solar panels are most likely reliable. Conventional Astronergy solar panels have:

Are Astronergy 345W solar panels a good choice?

Astronergy's 345W solar panels offer the best value on the market right now. If maximizing your budget is your primary goal, Astronergy's pricing is among the most competitive of all Tier 1 solar panel manufacturers. In this article, we'll review the Astronergy 345W solar panel and go over its ideal use case.

Which solar panels do Astronergy sell?

The below 4 panels are the ones that Astronergy are currently focused on selling in the Australian residential and commercial solar markets: The ASTRO 5s (CHSM54M-HC) series has a watt rating of 410 to 415W utilising half-cut monocrystalline PERC solar cells.

Are Astronergy solar panels a good investment?

But higher efficiency often equates to higher cost-per-watt. While Astronergy's panels are less efficient, they represent the best value around. Your array will take up more space, but the tradeoff is higher overall output per dollar spent. Tier 1 solar panels are warranted for 25 years.

Are Astronergy panels a good choice?

The main appeal of Astronergy panels is their low cost-per-watt. If you have plenty of space to build your system, Astronergy's 345W panels are the most cost-effective option on the market. At 70 cents per watt, you won't find a better value from any other Tier 1 manufacturer.

Who are astroenergy solar panels?

Astroenergy are a lower cost panel. Their parent company name is CHINT Solar, and they have an office in Adelaide, Australia. They have Bloomberg Tier 1 status, but as mentioned many times elsewhere, this reflects the company's financial position, not the quality of the solar panels they produce. They are not on our Best Solar Panels list.

"Solar power has great potential, since solar cells can be utilized almost anywhere," stated John Rice of GE Energy. "It already is a cost-effective source of power in many remote, off-grid locations, and as system costs come down, we expect demand will increase for on-grid residential and commercial applications."
