

Astroneer how to get the solar array to power base

What is a solar array in Astroneer?

The Solar Array is a power generation item in Astroneer. It requires sunlight to provide power and does not need a platform to operate. Solar Arrays are an ideal match to bases that already have lots of Batteries for power storage, since they don't provide power at night. The Solar Array will tilt to follow the sun.

How do I use a generator effectively in Astroneer?

To use a generator effectively, you must have a storage unit on the same platform for it to consume once the current unit runs out. Once there's no more organic material left to burn, the generator will stop producing power. Generators are useful when you need power quickly and are stuck.

Does Astroneer require power?

Anything you want to build in Astroneer comes with a power requirement. Whether it is smelting resources or crafting more advanced materials to use in your printer, you will need to make sure your base has power. When you first start out, your base will have a set amount of power that is generated from the shelter.

What resource is required to build batteries in Astroneer?

Power storage is going to be the biggest challenge you face when starting a new game in Astroneer. Batteries require lithium to be built and this is not a resource that is present on the starting planet. It does not matter as power is evenly distributed across all platforms.

Where can you place a power generation platform in Astroneer?

Power generation platforms can be placed at the start, the end or in the middle of a row of platforms. It does not matter as power is evenly distributed across all platforms. This means if you have 10 platforms in a row, you can place the power generation platform in any of these positions.

Is power storage important in Astroneer?

Power storage is going to be the biggest challenge you face when starting a new game in Astroneer. Batteries require lithium to be built, which is not a resource present on the starting planet. It does not matter as power is evenly distributed across all platforms.

Fly your spaceship/shuttle to a new location, set up there and go find a solar panel. Alternatively, find a spot using a rover/truck chain with the resources for a vehicle bay, plop down the habitat ...

Solar Panel/Array - Using sunlight, the solar panels feed power into your base. The amount of power generated varies depending on the planet's sun level. There is a Small and Medium Solar Panel with the largest being the ...

You need to connect a rover to the solar panel, and then to connect the rover to your base. The final result

Astroneer how to get the solar array to power base

should look like this: While answer does answer the question, the recent Basebuilding Update to the game has ...

Solar Array: 14.0 With Sunlight The amount of power generated varies depending on the planet's sun level: Very Low: 3.5U/s, Low: 7.0U/s, Medium: 14.0U/s, High: 21.0U/s, Very High: 24.5U/s Wrecked Solar Array: ...

Powering your base is a bit tricky at the start of the game. Until you have access to lithium, you are stuck having to scavenge batteries from the wild. For the moment, the best ...

Generating Power In Astroneer. Generating power in Astroneer comes in a couple of different forms. When you first get started, you will notice a device on your shelter that is producing a limited amount of power that will ...
