

What is the Global Solar Atlas?

The Global Solar Atlas is a free service provided by the World Bank Group that offers a solar resource database. It allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the database.

How do I start using the Global Solar Atlas?

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Why should you choose Atlas solar?

Atlas Renewable Energy has a track record of more than 5.6 GW of renewable energy projects with some of the largest and most prestigious companies operating in Latin America. We were the first company to provide bilateral solar PV PPAs to private markets without subsidies in LatAm. This demonstrates our expertise and commitment to renewable energy.

What is ESMAP's Global Solar Atlas?

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential sites for solar power generation virtually anywhere in the world.

Who is the largest owner of Atlas Energy?

Atlas Energy was initially supported by the Actis Group, making it Latin America's largest independently owned renewable energy independent power producer (IPP) and one of the world's fastest-growing renewable energy companies.

Why is the World Bank launching a global solar atlas?

The World Bank, in partnership with the International Solar Alliance (ISA), launched the Global Solar Atlas at the World Future Energy Summit in Abu Dhabi. It serves as an example of the World Bank's commitment to ISA and to scaling up renewable energy in client countries.
