

Where are Attic Breeze solar attic fans made?

Attic Breeze solar attic fans are proudly made in the USA using only the highest quality foreign and domestic parts to manufacture the best solar attic fans, solar roof vents, solar attic vents, and solar gable fans on the market and all of our products come standard with a residential lifetime warranty.

What is an attic Breeze solar attic fan?

The Attic Breeze Solar Attic Fan is built with stainless steel brackets that are designed to guard against rodents. The aluminum fan blades are 2" larger than the average size of fan blades in the market, which allows it to maintain its performance despite being confronted by extreme weather conditions.

How does Breeze mate protect my solar attic fan?

Breeze Mate also offers our proprietary attic depressurization testing technology to make sure your solar attic fans are properly installed, as well as an integrated fusible link safety switch to stop the operation of your solar attic fan or solar gable fan in the event of a fire in your home.

What is a solar attic fan?

Attic Breeze solar attic fans with UltraFlo Technology are the most efficient solar powered ventilation products available. The UltraFlo design gives Attic Breeze the most airflow for the least amount of power consumption, making our solar attic fan products extremely efficient.

Can a solar attic fan be installed on a roof?

With the wide array of colors available, the Attic Breeze Solar Attic Fan can be installed on just about any roof. The UltraFlo® technology of Attic Breeze Attic Solar Fan provides greater airflow for these solar attic fans, and the monocrystalline solar cells provide cost-efficient power production despite high temperatures.

Who is attic Breeze?

Attic Breeze is America's leader in solar powered ventilation, offering our customers the best performance, technology, and durability of any solar attic fan product available, which is why more contractors across the country choose Attic Breeze as their preferred solar attic fan provider.
