

What are solar-powered watches?

Solar-powered watches, as the name suggests, are watches that use solar energy to power themselves. The batteries of these watches charge via the usage of solar power or any light source, so they're always in working condition regardless of the situation. Designed for a variety of situations and lifestyles.

Are solar-powered watches worth buying?

As more people embrace the power of solar watches, you can expect them to become more common. In the meantime, there are plenty of solar watches to choose from, including options from brands like Casio, Citizen, Seiko, and even TAG Heuer's new solar-powered Aquaracer.

Which smartwatch is solar-powered?

The Garmin Fenix 7X Solar is a solar-powered smartwatch. It is the bigger version of the Garmin Fenix 7 Solar and comes with several added features, including a 1.4" solar-charged touch display.

Can solar power charge watches?

One innovation that has been developed over the years is the use of solar power to charge watches. Several watch brands, including luxury ones, have manufactured high-precision solar watches that have made use of batteries completely redundant.

Who invented solar-powered watches?

The Hamilton Watch company was actually the one to pioneer this technology in the mid-1950s. Hamilton's Ventura model was powered by a miniaturized solar cell and really pushed the technology forward. However, this model wasn't entirely solar-powered, as it required a battery to store the power.

Are solar watches sustainable?

Although electricity and battery-powered watches are still prevalent, solar watches are the more sustainable route forward. With solar watches, you do not have to run around looking for replacement batteries in a watch store. All you have to do is place the watch under the sun and your solar-powered timepiece will be fully charged.
