

How do I know if my power one Aurora solar inverter is bad?

To diagnose a faulty Power One Aurora solar inverter, start by checking the LCD display on the front of the chassis. If the display is working, identify the error codes shown to determine the issue. Both single phase (Uno) and three phase (Trio) models have this feature.

What does the LCD display on Power One Aurora solar inverters show?

Power One Aurora solar inverters, both single phase (Uno) and three phase (Trio) have an LCD display on the front of the chassis that shows information about the inverter's status. As part of their purchase, ABB took over the guarantee responsibilities from Power One.

What is the e031 error on a power one Aurora?

Home All Services... Power One Aurora The Power One Aurora was made for the UK market as mid range DC Inverter, we have replaced many of this with various errors between 8-12 years old. The E031 error is a common fault with Aurora/ABB inverters, unfortunately this is not repairable and a new inverter is needed.

Are Aurora solar inverters covered by warranty?

Aurora Power One Solar Inverters have a few common errors and, in some cases, these will be covered by the manufacturer's 5-year warranty. Have a look to see if your system is still in warranty (and therefore still covered), as well as reviewing the below common fault codes which can occur in Aurora solar inverters.

What causes the 'E031 - Error Read V' in Power One Aurora inverters?

The 'E031 - Error Read V' in Power One Aurora solar inverters is an error inside the solar inverter relating to damaged external relays.

Are Aurora solar inverters reliable?

Established in 1973, the company initially focused on power supply products and gradually expanded its portfolio to include power conversion solutions for renewable energy, particularly solar inverters. While renowned for their reliability, these inverters can occasionally encounter issues, signalled by specific Aurora error codes.

We offer excellent replacement inverters in our online shop: A great replacement for the PVI-3.0OUTD with one string connected is a Solis 3.0 S6 mini. For two-string systems you need a Solis 3.0 S6 dual MPPT. To replace a PVI ...
