

Australian government rebates for solar power

Who can get a solar rebate in Australia?

The best part is that the federal Australian solar rebate is available to virtually anyone in Australia who installs a photovoltaic system. Different states also have their own rebates and incentive programs. See the rebates by state section below for more information on what is available in your state.

When did Australia start a solar rebate program?

Australia introduced its federal solar rebate program in 2001 with the Renewable Energy Target (RET). The RET later split into two parts: the Small-scale Renewable Energy Scheme (SRES) for residential and small business installations, and the Large-scale Renewable Energy Target (LRET) for larger commercial projects.

What are Australian solar rebate programs & incentives?

Australian Solar Rebate Programs & Incentives by State as at November 14th 2024 Compare quotes from up to 7 installers in your area now. What is a Solar Rebate? A solar rebate is a financial incentive designed to make solar power more affordable for you by reducing the upfront solar panel installation costs in Australia.

Can you get a rebate for solar?

Technically, federal solar incentives under the Small-scale Renewable Energy Scheme (SRES) don't provide a direct cash rebate. Instead, solar systems generate Small-scale Technology Certificates (STCs), which have a market value and can be sold to offset installation costs.

What rebate programs are available in Australia?

Rebate programs in Australia include the Small-scale Renewable Energy Scheme (SRES), state-specific rebates, and local council schemes. Who is eligible for the Small-Scale Renewable Energy Scheme (SRES)? Households and small businesses that install eligible renewable energy systems like solar panels, wind, or hydro systems are eligible.

Why is Australia launching a battery rebate plan?

This reduces the need for expensive, non-renewable peaking power plants and helps keep energy prices down. On a larger scale, the battery rebate plan supports Australia's transition to renewable energy and the goal of achieving net zero emissions by 2050.
