

Average cost washington state solar power

How much do solar panels cost in Washington?

As of January 2025, the average solar panel system costs \$2.58/W including installation in Washington. For a 5 kW installation, this comes out to about \$12,901 before incentives, though prices range from \$10,966 to \$14,836. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Washington?

While a 5 kW system will only cost you \$12,901 in Washington, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Washington?

Do solar panels pay off in Washington?

Based on feedback from dozens of solar customers in Washington, the consensus is that solar panel investments pay off over time. On average, Washington homeowners with solar panels avoid \$59,116 in total utility costs over 25 years. The average solar panel installation costs \$2.68 per watt in Washington.

How much does a solar array cost in Washington?

While the average solar array in Washington costs around \$23,520 after the federal solar tax credit, prices typically range from \$16,464 up to \$30,576. The potential range is so wide because there are a handful of factors that can have an influence on the total. These include the following:

How much does electricity cost in Washington State?

Washington residents pay an average of \$108.14 per month for electricity, which means you stand to save an annual total of around \$1,297. While electricity rates are unusually low in Washington, the average resident still saves approximately \$14,213 over the lifespan of their photovoltaic (PV) equipment after the panels pay for themselves.

How long do solar panels last in Washington State?

Most home solar systems provide energy savings that eventually add up to more than the total system expense, which means your panels are expected to pay for themselves over time. The average solar panel payback period in Washington State is around 16 years, as compared to the average of 12 years throughout the rest of the country.

Based on the cost of electricity in Washington State and the incentives available for solar power, it is worth considering going solar in Washington. As of 2024, the average cost of electricity in ...

A solar panel lease costs \$100 per month on average, with most spending between \$50 and \$250 per month depending on their location and energy needs. Leasing solar panels is cost-effective and typically saves \$50 to

Average cost washington state solar power

\$100 per month on your electricity bills with little to no down payment.

However, solar energy still comes at a cost and isn't always cheaper than other options. If you are looking to install solar panels in Washington State, here's what you can expect. How Much Does A Solar Panel in Washington State Cost? A 5 kW solar panel system will typically have a sticker price of \$13,000 to \$18,000 in Washington State.

On average, Camas, WA residents spend about \$124 per month on electricity. That adds up to \$1,488 per year.. That's 44% lower than the national average electric bill of \$2,650. The average electric rates in Camas, WA cost 10 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in Camas, WA is using 1,255.00 kWh of electricity per month, and ...

On average, Tacoma, WA residents spend about \$121 per month on electricity. That adds up to \$1,452 per year.. That's 45% lower than the national average electric bill of \$2,628. The average electric rates in Tacoma, WA cost 10 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in Tacoma, WA is using 1,231.00 kWh of electricity per month, ...

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy ...

As of October 2022, the average solar panel cost in Seattle, WA is \$3.13/W. Given a solar panel system size of 5 kilowatts (kW), an average installation would cost around \$15,650. However, after claiming the 30% federal solar tax credit, the cost would drop to \$10,855.

On average, Puyallup, WA residents spend about \$180 per month on electricity. That adds up to \$2,160 per year.. That's 18% lower than the national average electric bill of \$2,650. The average electric rates in Puyallup, WA cost 14 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in Puyallup, WA is using 1,255.00 kWh of electricity per ...

* Local Solar Installers 2020/2021, Solar Reviews 2021, Energy Sage 2021, Wood Mackenzie 2020, National Renewable Energy Laboratory 2020 In Seattle, we found that the average cost of owning a 5 kW solar system ranges from \$14,250 to \$14,900, or in other words, from \$2.85 to \$2.98 per watt. And that's before considering the benefits of any ...

Find Cost Savings on Solar in Washington . The cost information presented in this article is derived from a comprehensive analysis, incorporating data from multiple industry sources. The average cost per watt per state was ...

While a 5 kW system will only cost you \$12,197 in Vancouver, WA, doubling the system size effectively

Average cost washington state solar power

doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Average solar cost by system size in Vancouver, WA

On average, Washington residents spend about \$166 per month on electricity. That adds up to \$1,992 per year.. That's 24% lower than the national average electric bill of \$2,628. The average electric rates in Washington cost 13 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in Washington is using 1,231.00 kWh of electricity per month, and ...

On average, solar panel installation in Vancouver, WA, costs about \$20,000 to \$40,000 before incentives and \$15,000 to \$30,000 after Washington state solar incentives are applied. However, solar panel costs can easily be ...
